

## REMARKS

### **Rejection of the Claims Under 35 U.S.C. §112, second paragraph**

Claims 1, 4, 5, and 6 have been rewritten in proper format for method claims consistent with US practice. Claim 2 has been rewritten as an independent compound claim. Claim 7 has been cancelled and replaced by new method claim 9. Newly added claims 10 and 11 find support in the specification at page 38.

### **Rejections of the Claims Under 35 U.S.C. §§102/103 and Obviousness-type double patenting**

Claims 1-8 stand rejected under 35 U.S.C. §102(e) as being anticipated or obvious under 35 U.S.C. §103 in view of the Lehmann et al. patents (US 6,245,804 and 6,344,454) and double patenting.

The compounds recited in claim 2 are neither anticipated or obvious in view of the patents to Lehmann *et al* (US 6,245,804 and US 6,344,454). US '804 and '454 disclose phthalide and benzoxazine compounds (see e.g., column 5, lines 51-67, column 6, lines 1-67, column 7, lines 1-3, column 7, lines 8-15, and column 8, lines 4-28). However, the art references fail to establish why one of ordinary skill in the art would be motivated to modify such compounds so as to arrive at a compound in accordance with Applicant's claim 2. A generic disclosure by itself does not render obvious every embodiment encompassed therein. See e.g., *In re Jones* (CAFC 1992) 958 F.2d 347, 21 PQ2d 1941 and *In re Baird* (CAFC 1994) 16 F.2d 380, 29 PQ2d 1550.

US patents 6,245,804 and 6,344,454 disclose that the compounds of their formula I are nonsteroidal gestagens that can be used alone or in combination with estrogens for contraceptive purposes, treating endometriosis, gynecological disorders, premenstrual disorders, androgenic action, male birth control, and for treating andrological diseases. US '804 and US '454 also disclose that the compounds partially show action on glucocorticoid and/or mineral corticoid receptors.

However, there is no disclosure or suggestion in the '804 or the '454 patents of using the compounds described therein in treating inflammation or inflammatory, allergic or proliferative processes. Moreover, there is clearly no motivation in the Lehmann patents which would lead

one of ordinary skill in the art to use such compounds for treating inflammation or inflammatory, allergic or proliferative processes. Absent such motivation, there can be no proper legal basis for a rejection of the present claims under 35 U.S.C. §103.

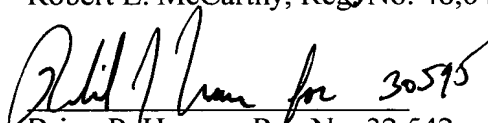

The rejections of the claims under 35 U.S.C. §102(e) and/or §103 and the judicially created doctrine of obviousness-type double patenting is improper and should be withdrawn.

In view of the above amendments and remarks, it is submitted that this application is ready for allowance. Early notice to this effect is earnestly solicited. If the Examiner should have any remaining issues he is cordially invited to telephone the undersigned at the number indicated below.

The Commissioner is hereby authorized to charge any fees associated with this response or credit any overpayment to Deposit Account No. 13-3402.
